Study Plan for the Master's Degree

Name: _____ Email: _____ Perm # : _____

Admission Qtr: _____ Area of Emphasis: _____ ☐ MS ☐ MA

Coursework (may continue on back of page)

Course	Year/Qtr	Units	Grade	Comments
MAT 200A				
MAT 200B				
MAT 200C				
MAT 201A				
MAT 201B				

REQUIREMENTS

- Total number of units: 60 (48 must be upper-division or graduate level)
- No more than 12 units total of MAT 596 and MAT 293/299
- Units for project research or teaching assistant duties may not be credited to degree
- Maintain a cumulative GPA of 3.0
- Receive at least a B in core courses

Thesis Additional Requirements

- 20 of 48 units must be in graduate level coursework (excluding units for internships, TA duties and 596)

Project Additional Requirements

- 24 of 48 units must be in graduate level coursework (excluding units for internships, TA duties and 596)

Residency requirement: Three quarters in residency

☐ Thesis or ☐ Project (check one) topic:

Name of committee chair or co-chairs:

Other committee members (list department if not MAT):

List quarters in residence (e.g., F08):

Shaded Area for Office Use Only

☐ Thesis ☐ Project

GPA:

Date completed/defended:

Qtr Degree Awarded:

Student Signature: Date

Graduate Assistant Date

Signature of Research Advisor (or assigned advisor, if no research advisor yet): Date

Graduate Advisor Date

Directions for Completing the Master's Study Plan

The study plan is intended to serve as a roadmap for your MAT education. It should reflect what you have accomplished in the program to date, as well as your *tentative* plans through the completion of your degree. Tentative plans may change, but this is an opportunity to indicate your expected path, to the best of your knowledge, and to discuss that path with your advisor.

The study plan should be a cooperative effort between you and your and faculty advisor. The typical sequence is as follows:

- Fill out the information at the top, including the quarter you started as an MAT student and your area of emphasis (e.g., multimedia engineering, visual and spatial art, electronic music and sound design).
- List the courses you have taken so far towards your MAT degree (note if you have placed out of a core course), including courses in which you are currently enrolled.
- List courses that you plan to take in the future in order to satisfy your degree requirements (and any extras).
- List the academic quarters you have been enrolled in residence at UCSB in MAT.
- Fill out information on your project or thesis: the topic (or title, if known), committee chair and members. Again, this is tentative – especially in the early quarters of your program. You may leave parts of this blank if you have not yet thought this through.
- *Schedule a meeting with your advisor* to go over the plan – especially the steps to completing your degree. Once your advisor has discussed this with you and approves the plan, both of you should sign the form.
- Return the form (in person or via campus mail) to Graduate Program Assistant in the MAT office by the due date.
